

A Child Theme for Divi by Divi Lover

Installation & Customization Instructions

Version 1.0 - May 2017

Requirements

You must have the <u>Divi Theme by Elegant Themes</u> installed to use this Child Theme. An Elegant Themes Membership is required to download the Divi Theme. The Divi Theme is NOT included with this child theme.

Please note:

All the images and videos included in this Child Theme were released on <u>pixabay.com</u> under <u>Creative</u> <u>Commons CC0</u> license.

Ensure you have the Divi Theme installed and activated prior to installing the Ally Child Theme.

To avoid any issues during installation it is highly recommended that you use this child theme on a fresh installation of WordPress.

It is also a good idea for SEO purposes to navigate to:

Settings > Permalinks and set the Common Settings to Post name.

Dashboard	Permalink Settings					
🖈 Posts	WordPress offers you the ability to create a custom URL structure for your permalinks and archives. Custom URL structures can improve the aesthetics, usability, and forward-compatibility of your links. A number of tags are available, and here are some examples to get you started.

	Save Changes					

Preparation

Step 1.

After purchase, download the *unzipme_ally.zip* file from your account page at the marketplace you purchased from or click the download link in your purchase confirmation email.

Step 2.

Unzip the *unzipme_ally.zip* file to your computer, it contains the following files:

ally_child_theme.zip - the Ally child theme files
demo-content.xml - the Ally theme demo content
theme-customizer.dat - the Ally theme customiser settings
ally-widgets.wie - the Ally theme widgets settings
style.css - a backup of the Ally style sheet

Theme Installation

Step 3.

In your Wordpress admin panel navigate to *Appearance > Themes > Add New* and click on *Upload Theme*. Locate the *ally_child_theme.zip* file on your computer and then click *Install Now*.

When the install is complete click on *Activate*, you will then see the Ally Child Theme as the active theme in your theme panel.

Plugin Activation

Step 4.

Above the theme images you will see a notification telling you which plugin Ally requires. Click on **Begin Installing Plugins**.

This theme requires the following plugins: Divi Widget Builder and One Click Demo Import.

Begin installing plugins | Dismiss this notice

Next, select both plugins and choose *Install* from the drop-down menu under the plugin list and click *Apply* button. This will install and activate the One Click feature to import all the demo content and settings and the Divi Widget Builder Plugin.

Import Settings & Demo Content

Step 5.

You will now see a new submenu item under the *Appearance* menu called *Import Demo Data* click on that item.

Next you will see this screen with a blue button called *Import Demo Data*. Click the button only once and wait, it can take a couple of minutes.

After a little while you should get the following message that the demo data has been imported successfully. You can now deactivate and remove the One Click Demo plugin if you wish but you don't have to. That's it!

That's it, all done!

The demo import has finished. Please check your page and make sure that everything has imported correctly. If it did, you can deactivate the **One Click Demo Import** plugin, because it has done its job.

Theme Customizer

Your site should now look exactly like <u>Ally demo page</u>. You can navigate to **Divi Theme Customizer** to change the colors of gradient overlays and CTA menu item.
