Element animations:

- Fully integrated WOW animation library to the child theme:
- We fully integrated WOW animation library to the child theme. You can easily animate any Divi element. Create stunning web pages!

Works best with Rows and Modules.

How to use WOW Animation

- Add class "wow" with below classes into Row or Section or a Module.

Example : "wow bounce" , "wow swing" , "wow bounceInDown" etc.

- In Divi- Agency Child Theme we only added wow animation classes to 'about' page. <http://diviagency.divithemecenter.com/about/>
